EXPERIENCE

TraderPorts | Data Scientist

Jan 2025 - present

- Developed an internal **multi-route AI decision-support system** that automated key trading workflows (news analysis, chart insights, psychology, investment logic), reducing full analysis time from **15 mins to just 3 mins**.
- Integrated real-time LLM commentary with TTS voice guidance to provide continuous actionable insights during fast market movements, improving trader **decision-making speed by 60%** across all trading environments.
- Built a **Voice-to-SQL AI agent** that converts spoken trader queries into instant dashboards, **reducing analysis time by 90%** and enabling hands-free decision support within real-time market environments.
- Built an **automated news-sentiment pipeline** processing 150+ market headlines per day, **increasing the speed & reliability** of market assessments for faster, **more confident trading decisions** powered by real-time LLM analysis.
- Applied **ML + statistical modeling** to uncover hidden trading behaviors, improving clarity, speed, and profitability of decisions and automating repetitive analysis tasks to **enhance consistency** across all trading scenarios.

TECHNICAL SKILLS

- **GenAI / LLMs:** OpenAI GPT, Groq, RAG, Prompt Engineering, LangChain, Agentic AI, LLM , Multi-Agent Systems
- **Machine Learning:** Scikit-learn, Model Evaluation, Feature Engineering, Predictive Modeling, NLP
- **Deep Learning:** TensorFlow, CNNs, RNNs, Transformers, Embeddings, Classification & Sequence Models
- **Programming:** Python, SQL, HTML/CSS, JavaScript, Flask, Streamlit, ReactJs, Langchain, Java
- **Tools & Software:** MS Office Suite, Git, Database Management, PowerPoint, Canva, Jupyter Notebook, Azure

PROJECTS

🔗 AI Multimodal Fashion Assistant (Agentic AI System) [\(Link\)](#)

- Built a **multimodal Assistant using Vision AI + LLMs** to analyze images and deliver 90%+ outfit recommendations.
- Built **7+ autonomous agents (Vision, Event, Budget, Trend, Gift, Region, Recommender)** enable efficient decision.
- Developed an LLM-driven ranking engine using event, budget, & trend signals, **increasing recommendation by 55%**.
- **Automated** the end-to-end styling workflow, **reducing query-to-recommendation time by 70%**.
- Added full speech-to-text + TTS support, enabling hands-free usage and **reducing user effort by 60%**.

🔗 AI ClassMate — Multirole Agentic Ed-Tech System [\(Link\)](#)

- Built an **LLM academic assistant** supporting students, teachers, and parents through chat, evaluations & **predictions**
- Designed **Agents (RAG-backed)** for doubt-solving, homework, evaluation, performance insights & **parental dashboard**
- Achieved **85%+ accuracy in score predictions** by historical analytics, **LLM reasoning** & structured student data
- Increased student **engagement by 60%** through real-time chat, adaptive test creation & personalized learning paths
- AI-driven early-risk detection for declining performance or attendance drops, **improving intervention timing by 40%**

EDUCATION

Guru Gobind Singh Indraprastha University
B.Tech - Information Technology - (CGPA- 9.032)

Nov 2021 – July 2025
New Delhi , India

Jawahar Navodaya Vidyalaya, Prayagraj (Allahabad)
Class XII - (85.4%)

Prayagraj, Uttar Pradesh

CERTIFICATION

- Code with Harry Data Science Course [\(Link\)](#)
